

For health, relaxation and fun!

@ease Plug n Play System

Video Orientation

START-UP (Fresh Fill)

- 1) Double check that drain cap is securely fastened. Remove filter and fill hot tub with hose placed in filter compartment. Once filled, remove hose and reinstall filter cartridge.
- 2) Supply power to hot tub by plugging the power cord into the outlet. Note: Power supply should always be disconnected when draining or filling.
- 3) With Jets ON, add **SpaFrog Jump Start** packet to the water (one packet per 600 gallons).
- 4) Remove the **Blue @ease Mineral Cartridge** from the box. This cartridge will last 4 months.
- 5) Attach the **Silver @ease SmartChlor Cartridge** to the **Blue Mineral Cartridge**. This cartridge will last 2-4 weeks depending on size of hot tub. Set the dial on bottom of **SmartChlor Cartridge** per Chart.

@ease SmartChlor Chart

200-299 Gallons—Setting 1
300-450 Gallons—Setting 2
451-550 Gallons—Setting 3
551-600 Gallons—Setting 4

- 6) Start-up is now complete. Close and lock safety cover. Allow 12-24 hours for water to heat.

Well Water users may be required to bring sample water in for testing for a customized treatment routine

WEEKLY CARE

- 1) KEEP FILTERS CLEAN—Pumps work extra hard when dirty filters restrict water flow and may cause FLO errors, cloudy water, etc. Remove and clean filters with high pressure nozzle provided.
- 2) If the @ease floater is 'silver-side-up' it is time to replace the **Silver @ease SmartChlor Cartridge**. This cartridge will last 2-4 weeks.
- 3) When you replace **Silver @ease SmartChlor Cartridge**, (with jets ON) add packet of **Frog Maintain** or **SpaGaurd Enhanced Shock** to filter area

REGULAR CARE (as needed)

- 1) Every 4 weeks or so, remove and soak filters in **SpaGuard Filter Cleaner** to remove oils and biofilm.
- 2) Every 1-4 months, clean & condition safety cover per manufacturer guidelines.
- 3) Every 4 months, remove and replace **Blue Mineral Cartridge**.
